

Centrifugal Decanters and Separators

Decanters

Decanter centrifuges provide exceptional performance when separating solids from 1 or 2 liquid phases in one single continuous process. The units are designed to handle a wide range of particles with diameters from mm to a few microns. With their high efficiency, continuous operation, low capital cost/capacity ratio, low maintenance costs and low energy consumption, the decanter centrifuges are ideal to use in a range of duties including process, food and waste applications.

Separators

Separate fluids, solids and gases with outstanding precision and low running cost. Based on proven technology with a reputation for reliability in industries such as food, pharma, chemical, oil and wastewater treatment.
